Dear Friend,

Join us **October 8 - 10, 2010 for a special NADA/F meeting at the DoubleTree Hotel, Arlington/Pentagon VA** from Friday evening through Sunday 1:00 pm. Only \$99 per night for the hotel, including breakfast, and \$10 registration includes lunch and more.

Everyone is welcome! Learn from the experts, and others who have had similar experiences, from air disasters recently to those long ago. Enjoy the company of family members, aviation professionals, experts, government officials, journalists and more.

This year we also plan to have video available if you would like to record a message for YouTube, [our website](#), or your own use.

Welcome to Special Guests and Speakers:

- **Deborah Hersman**, National Transportation Safety Board (NTSB) Chair, and long time friend to family members. We will have an opportunity to learn more and ask questions about important safety issues.

- **Bob Jensen**, President and CEO of [Kenyon International](#) and friend to NADA/F. Bob Jensen will talk about lessons learned in the area of family assistance, what has changed, and update on domestic and international assistance. Check their website for an overview of their excellent global services for air crash survivors and family members.

- **Christine Negroni**, Aviation Journalist with the "New York Times," author of "Deadly Departure: *Why the Experts failed to prevent the TWA 800 disaster and how it could happen again*," and host of her very newsworthy. [Blog](#)

- **Bob Rendzio, Ray Holanda**, and others who represent NADA/F members on FAA Rulemaking Committees will update us on their important work.

- **Most important!** We will have time to hear from our members -- family members and experts --about your concerns, priorities, and the amazing work that you do.

The list is growing! There are serious concerns that we must address regarding increased disasters of commercial commuter flights, icing, aviation security, whistleblower protection, what we need to know to keep our family safe from medical helicopter crashes, and always the need for "**One Level of Aviation Safety.**"
