

What to Expect from Governments

1. Quarantine of Outbreak Sources
2. Changing Travel Restrictions
3. Burden to Companies – air transport / cruise / bus
4. In Country Quarantine Centers – several now established
5. Given the history of response and trends of those responses – SAR / MERS / H1N1 / Ebola – more reaction than not, which means more controls.
6. Focus on control and containment, why medical information takes a secondary role
